

To qualify for the 2 year warranty the appliance must have been used according to the manufacturer's instructions. For example kettles should have been regularly de-scaled. If your appliance stops working or develops a fault then return it to your nearest store and we will happily replace or refund the item, with exception of the below exclusions:

EXCLUSIONS ASDA shall not be liable to replace goods under the terms of the

- warranty where: 1. The fault has been caused or is attributable to accidental use, misuse, negligent use or use contrary to the user manual's recommendations or where the fault has been caused by power surges or damage caused in transit.
- 2. The appliance has been used on a voltage supply other than that described on the product rating label.
- **3.** Repairs have been attempted by persons other than our service staff (or authorised dealer).
- 4. Where the appliance has been used for hire purposes or

5. ASDA are not liable to carry out any type of servicing

work, under the warranty

This warranty does not confer any rights other than those expressly set out above and does not cover any claims for consequential loss or damage. This warranty is offered as an additional benefit and does not affect your statutory rights as a consumer. If for any reason this item is replaced during the 2 year warranty period, the warranty on the new item will be calculated from original purchase date. It is vital to retain your original proof of purchase to indicate the date of initial purchase.

How to...

...clean your toaster and accessories

- Make sure the toaster is disconnected from the power and is completely cool. 1. Use a damp cloth to clean the outside (don't use abrasive cleaners, as these can damage the surface of the toaster, or metal polish).
- 2. You should regularly pull out the crumb tray on the side of the toaster and dispose of the contents. This should be done once a week if the toaster is used regularly. Always make sure the tray is inserted back in properly before using the toaster.

3. To clean the glass panel, make sure the crumb tray is empty first. Turn the toaster upside down and slide the inner glass panel latch from "LOCK" to "OPEN" to pull out the glass panel carefully to clean. Clean the glass with a damp cloth or warm soapy water as needed. Do not use abrasive cleaners, and ensure it is fully Always make sure the glass panel is inserted in place and slide the inner glass panel latch from "OPEN" to "LOCK". Do not use the toaster without the glass

4. When not in use or when placed in storage, the power cord should be wound under the bottom of the toaster.

- 7. The outer surface may get hot when the appliance is
- 8. Let the appliance cool down in a location out of reach of children or persons with limited mental abilities before
- 9. The bread may burn, therefore do not use the toaster near or
- below combustible material, such as curtains. 10. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- 11. Before connecting the toaster to the power, check the voltage shown on the appliance corresponds with the voltage in your home. If it doesn't, contact your local store.
- 12. This appliance is classified as protection class I and must be connected to a protective ground.
- 13. To avoid fire, electric shock, or injury, never immerse the toaster, cord, or plug in water or liquid.
- 14. Keep away from harsh or abrasive cleaning agents or solvents. 15. Remove all protective wrapping prior to use.
- 16. Do not use if the appliance, cord or plug is damaged.17. Always place on a firm, level surface, out of reach of children.
- 18. Do not wrap or wind the cord under the bottom of the toaster. 19. If the toast starts to smoke press Cancel immediately.
- 20. Avoid toasting food that has been buttered or covered with
- 21. The cord shouldn't hang over the edge of a table or counter, or touch a hot surface.
- 22. Keep away from hot gas, electric burners and ovens.23. Don't attempt to dislodge food while the toaster is in use. After use, take the bread out carefully to avoid injury. If the bread is jammed, unplug the toaster before trying to remove

(we recommend using sliced bread to avoid jamming).

- 24. Be sure not to damage the internal mechanism or heating elements when removing bread.
- 25. Unplug when not in use and before cleaning. 26. Do not use attachments not recommended by the
- 27. Don't use the toaster for anything other than its intended use.28. Please don't dismantle. If a fault occurs have the toaster
- inspected in a qualified repair shop or return to us at ASDA.

29. The power consumption is 0 W in the off mode.

The period after which the equipment reaches automatically off mode is less than 1 min.

4. Press the lever down until it locks into place and the Cancel light is illuminated (this will only happen when the toaster is plugged in and switched on).

Once the bread has been toasted the lever will automatically spring back up and can be lifted slightly further upward to easily remove the toast. Do not leave the toaster unattended when

this could damage the toaster.

5. If you want to stop toasting at any point, just press the Cancel button and the lever will Please don't try to manually force it up as

6. Frozen bread can still be toasted. Simply set the control dial to the desired position, push the lever down and press the **Defrost** button so it illuminates.

7. For reheating cold toast, just place the toast into the bread slots, push the lever down and press the **Reheat** button.

You don't need to use the control dial as the reheat mode has a set time.

How to... ...use your toaster

1. Check the crumb tray on the side of the toaster is fully inserted, then slot up to two slices of bread into the bread slot.

2. Plug the toaster into the power socket and switch it on.

3. Set the control dial to your desired setting, 1 being the lowest and 6 being the highest.

You may want to start with a lower position and then adjust to your taste (bread may be slightly more toasted when only toasting one slice or when using for extended periods of time).

You should have glass wall toaster

How to...

...recognise the parts of your toaster

How to...

...prepare your toaster before first use

Oil or manufacturing residue may remain on the heat elements, so it's usual for the

toaster to emit an odour when used for the first few times. This is perfectly normal and can be prevented by following these quick steps:

1. Slot the plug into the mains socket and turn the power on.

2. Set the control dial to number **4**.

3. Push the lever down until it locks into place. The smoke emitted from the toaster could set the smoke alarm off, so please do open a window beforehand.

The heating element bars will glow red as they heat up to operating temperature, this is normal and nothing to be worried about.

4. Wait for the lever to pop upwards.

5. Allow the toaster to cool and then repeat.

6. When there is no more odour the toaster is ready to use.
