

CREATE YOUR OWN SUNGLASSES

- 1 Use colouring pencils to design the outer frame and arms of the sunglasses.
- 2 Carefully cut out the sunglasses front, sides and lens templates.
- 3 Cut out the centre of the frames (remember to ask for help as this can be a little fiddly).
- 4 Use the lens template to cut out two coloured lenses.
- 5 Get your glue and stick your coloured lenses to the back of the frame.
- 6 Fold the arms on the dotted line and glue them to the back of the glasses frame.
