2.1 Rainforest Alliance – Exceptional Use Policy

In specific relation to the production of Banana and Pineapple crops for whole head supply, IPL concedes to permit the use of specific pesticides in line with the Rainforest Alliance Exceptional Use Policy. This is on a derogation based approval basis only, providing the exception expiry dates and conditions of use are adhered to in full. For further information the supply should contact their relevant category technical manager. Derogations should be requested using the procedure notified in the PPPL Policy Document.
